.... The testing was conducted off site (Susan and I parked on the southwest lane of Ward Rd. approximately 800 feet southwest of Salome Hwy (the measurement was calculated by using the 2009 Maricopa County Aerial photography and measuring tool)). Susan Avans conducted the visible emissions testing while I took pictures. Closely after arriving to the desired offsite location (approximately 3 to 5 minutes), I was approached by an individual that worked at the site, and I do not recall the Hickmans Egg Ranch workers name. I quickly went over who Susan and I were and our purpose for stopping near the operation (dust observed while driving off site) with this gentleman. This Hickmans Ranch worker then went back on the property and proceeded with his day. It appeared that the operation was going to cease, but it did not.

Approximately after 5 to 7 minutes of being in visible emissions position, both Susan and I were approached by Project Coordinator with Hickmans Egg Ranch, Paul Yeatts. At this time Mr. Yeatts was introduced to Susan. Mr. Yeatts and I had already met from a prior visit (for an odor complaint CC# 237736 (non-inspection)). Prior to going over the reason for our presence, I went over the inspection rights with Mr. Yeatts and an official copy of the inspection rights was hand delivered to him prior to leaving the site.

Mr. Yeatts believed that the loading operation (loading of limestone material that is used for feed) was part of the agriculture process and they were exempt.

Video were also taken of the operation.
